

NFC Bamboo Coasters

product specifications

Details

- 5mm thick bamboo block coasters, manufactured in the UK from sustainable Moso® bamboo in warm caramel tones.
- Fitted with NFC technology (Near Field Communication) that allows two devices to talk to each other when close together.
- This combination creates a powerful marketing tool as the URL is stored and will always direct users to it for the life of the product.
- The contents of the NFC are locked and can be updated as required by the end user.
- Laser cut in two standard sizes of 92mm round or square
- Full colour process print or laser engrave
- Minimum order quantity of just 25

Size/s

Standard: 92mm round or 92mm square

**nb. Bamboo products may vary to that shown (grain & colour).
NFC: URL to be supplied at point of order. The URL is locked into the NFC within the coaster and can not be rewritten once physically programmed. Contact us for more information.*

Material/s

Coaster: Moso® Bamboo material only comes from licensed managed forests and once harvested every 5 years is made in production facilities that are ISO 9001 quality and ISO 14001 environmental third party certified. It complies with the most stringent international material standards. Moso® bamboo combines all of the virtues of hardwoods with the immense growing capacity of the highly renewable giant Moso® bamboo species and can therefore act as a green carbon negative alternative material where no additional water or pesticides are needed. Bamboo material simply biodegrades at end of life. 1p from every item made from sustainable materials will go towards our tree planting scheme. Every item made will help us plant 20k trees every year.

Printing and Engraving on Bamboo: Bamboo is soft enough to get a beautiful deep engraving whilst hard enough not to burn and char. It has great ink adhesion for printing, with little or no colour change on process print.

Backing: Cork is a 100% eco. Renewable, recyclable and biodegradable, it is naturally harvested from tree bark without the need for cutting down the whole tree. It is also waterproof, buoyant, flexible and fire resistant making it an ideal backing for our bamboo coasters.
