

# KeepSafe Office Tools

product specifications

Keepsafe Commute

Keepsafe Hook

Keepsafe Office

## Details

- Keepsafe tools are designed to help you avoid contact with the most commonly used surfaces, including on public transport and in shared spaces which pose the most risk. Can be personalised with a name for an extra level of safety and security, easy to keep clean with soap and water when people wash their hands
- Manufactured in the UK from tough and easy to clean 5mm thick white, clear or black Greencast® acrylic, laser cut to shape
- Big enough for adult hands and will fit easily into a bag, or hung from a lanyard, for carrying with you everyday
- Tools can be printed in full colour, single or double sided or simply supplied as plain stock
- Can be personalised with individual names by laser engraving
- Minimum order quantity of just 25
- Part of the KeepSafe range of personal protection products, see website for more details

## Size/s

KeepSafe Commute: 140mm x 150mm

KeepSafe Hook: 110 x 100mm

KeepSafe Office: 70mm x 45mm

## Material/s

**Greencast® acrylic disc:** is produced from 100% recycled acrylic and is 100% recyclable at the end of its useful life if disposed of correctly, creating a full circular economy for the prevention of acrylic plastic waste ending up in landfill. Greencast® acrylic uses a proprietary process for the recovery of the original solvent (PMMA) for the production of new acrylic which can, in turn, be recycled countless times without ever losing its virgin quality. All our Greencast® acrylic factory waste is recycled for zero landfill production.
