80mm x 150mm x 28mm 95mm x 175mm x 28mm 110mm x 200mm x 28mm 125mm x 225mm x 28mm

## Material/s

Wood is inherently renewable and sustainable when properly sourced and managed and we only use wood from suppliers with proven supply chain certification to international standards. As a natural material, wood has a lighter carbon footprint than almost all synthetic materials. All wood types simply biodegrade at end of life. Production waste is used in agriculture and home heating due to its incredibly low moisture content. 1p from every item made from sustainable materials will go towards our tree planting scheme. Every item made will help us plant 20k trees every year.

**Oak** - Engraving produces a distinctive 'burnt' effect quite different to other wood types but with a good level of contrast. **Cherry** - Great to engrave, producing strong contrast and good clarity.

Walnut - Engraves well but the darkness of the wood provides less contrast than other wood types.

**Maple** - Closed, wavy grain it engraves well with good definition but contrast is not as strong as other wood types.

**Beech** - The smooth surface of beech wood allows for precise detailing in engraving, capturing intricate designs with clarity.

All wood types have good ink adhesion, digitally print well, with good colour accuracy.

## Size/s

A choice of 17 standard shapes included in the wood block awards range:

\*nb. Wood products may vary to that shown. Natural inconsistencies occur in wood (colour, blemishes, grain) which add greatly to the individuality of each order.
