Bespoke: Any size/shape up to 35mm x 35mm

Material/s

Aluminium: Aluminium is one of the most sustainable materials around. Recycling aluminium is widely done and saves about 90% of the energy it takes to make new aluminium, also reducing the mining of the bauxite ore needed. Due to its wide and varied applications, the commercial and domestic recycling infrastructure of aluminium is continually growing and all our aluminium production waste is sold for recycling, the proceeds of which are used to plant trees with Ecologi. Recycling of aluminium varies widely in the UK with plenty of local council metal recycling centres.

Fitting: Fittings are either self adhesive or cemented butterfly clutch pin depending on badge size and shape (17mm round magnetic fittings or zip pull fitting available at an extra cost).

metal butterfly clasp
(Standard fitting)

self adhesive butterfly clasp
(Standard fitting)

Small round magnetic clasp
(Available at additional cost)
